Richard,

I don't think it's a bad idea to include dry decon of your boots in the plan. I think of it as a good housekeeping or hygiene type step (like washing your hands when you are done with the site walk) that can be documented, but I can see why START didn't put it in the HASP since no exclusion zone entries are planned. I think it's fine to leave it in :)

Lori – I re-read START's (Tom Vroman's) initial comments on the HASP, and he said they left some areas blank that we not applicable, such as the decon plan, etc. I actually did check off the decon plan and filled in the corresponding place in the HASP. I'm curious if you think I really needed to or not – since there will be no START there and no "hot" zone entry. Not sure here.....

Thanks,

- Richard

Hi Lori. Can you please review this draft HASP for my upcoming site walk? In the original draft, the fill-in boxes in Section II were left blank, but I think I need to fill the appropriate ones in. Let me know what you think.

Thanks,

- Richard
